

An abode of
Sparkling Minds

WHY CHOOSE US?

According to child care study and research, it is evident that growth of toddler's mental and physical abilities progress at an astonishing pace and a very high proportion of learning take place from birth to age six. It is a time when children particularly need high quality personal care and learning experiences. That's exactly where Springboard steps-in.

The quality of early learning experiences defines the future of a child. And to grow into lifelong learners, they must be able to explore the environment around them and solve problems, use language to express themselves and interact with others.

We have a vision - one that will help our children reach their full potential, in a safe and secure environment, where they will truly come into their own, it's the beginning of a success story.

CURRICULUM

The curriculum is designed by top class educators who have done intensive studies on child growth and learning capabilities. We don't teach from textbooks but we let the students evolve into their natural footings and guide them.

To embrace the strength, capability and resilience of a child, the curriculum at Springboard is inspired by the principles of the British Early Framework, the Reggio Emilia Approach, SCERT / NCERT and the revolutionary thinking of Howard Gardner.

Our curriculum is child-led and believes children are communicators and form an understanding of themselves and their place in the world through interactions. As adults, we believe, we are mentors or guides, and the environment is the third teacher.

TEACHER TRAINING PROGRAM

Systematic in-service training, over and above teachers' formal education and experience, is a significant facet of quality education. It gives an opportunity to improve and upgrade the teaching abilities of the faculty. At Springboard, we conduct orientation sessions for the teachers every month and a workshop once in 3 months.

TEACHING METHODOLOGY

At Springboard, we've constructed an inspiring programme that ensures a firm foundation for the next stages of learning - the framework of iTeach - an acronym for the 6 principles of nurturing early learners.

- Our teachers understand a child's knowledge capabilities
- They observe their needs and abilities
- They are widely experienced in child development principles and how children learn
- Every teacher receives monthly training from the trust
- They have realistic expectations and demands on children
- They plan developmentally stimulating activities
- They ensure the learning environment is conducive to a child's needs and interests
- Teachers tirelessly work towards building connections between a child's prior learning and new learning

INFRASTRUCTURE

With hundreds of wavering thoughts in mind, a child is always on his toes to do something new, something exciting every other second. To aid his keenness and bring a lift in his zeal, Springboard is equipped with all the sophisticated gears for the overall development. All the toys, tools and furniture that children interact with, are imported from the best parts of the world and are completely child-safe.

We are the only school in the country to provide best educational aids to every child, for advanced learning.

HEALTH CARE

Like how, during early age children learn and grow at a greater pace, they are also more susceptible for infections & diseases for number of reasons. A child's health is equally important as his education. By enabling clean and hygienic environment around the children by trained staff we not only ensure healthy today but also a bright and prospering future.

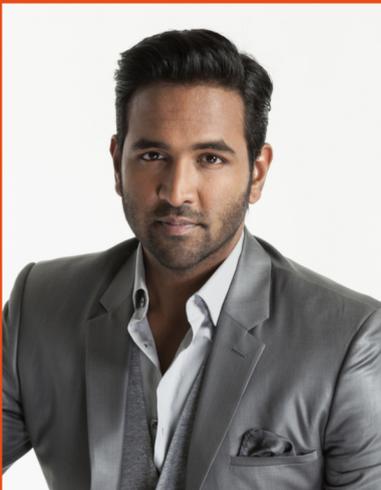

We have also been tied-up with reputed hospitals for annual health and dental check-up of the children.

GUIDING PRINCIPLES

Parents know that the early years are important in building a strong foundation for life-long learning. As parents, you understand your child most intimately and therefore play an important part in providing a home environment that will support the learning and development of your child.

Your role in the holistic development of your child continues when he/she attends pre-school. It is therefore helpful for you to know the principles which guide the learning experiences that are planned for your child by his pre-school and his teachers.

VISHNU MANCHU Chairman

As an Artiste, Educationalist and the CEO of the Sree Vidyanikethan Educational Trust, Mr. Vishnu Manchu endeavors to shape the students of the School into generations of dynamic and capable individuals, each of who add value to the society and create a distinct identity for themselves.

Mr. Vishnu Manchu completed his B.Tech in Computer Science and Information Technology and is an alumnus of the Sree Vidyanikethan Engineering College. His strategies, conceptualisation and implementation are crafted to empower the youth, especially young women, through constant perseverance, and Springboard lays the foundation for precisely this.

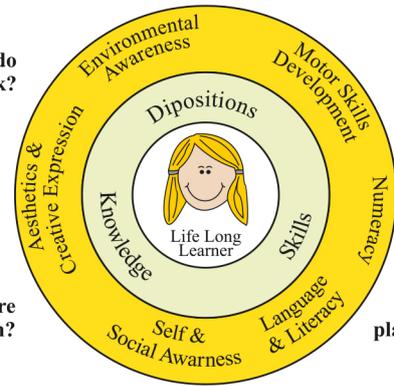

Who am I?

How do things work?

Who are the people around me?

Who do I share the world with?

What are the places around me?

LEARNING WITH ITEACH

- I** Integrated Learning
- T** Teachers Support
